

Spelling Bee contest held

Winners of spelling bee competition with principal and teachers

In the time and age of auto-correct predictive text and spell check, the valuable knowledge of correct spellings still remains important. Keeping this objective in mind, a spell bee competition for students of grades I and II was held at City International School, Pimpri on November 13.

The purpose of conducting this competition was to acquaint students with new words and encourage them to enhance their vocabulary.

After grilling selection rounds, eight students were qualified for the final round.

The final rounds of the spelling bee competition included dictation, choosing the correct option, identify-

ing the correct spelling, unscrambling the letters and identifying the pictures and spelling them out. The words encompassed the streams of literature, science, general knowledge etc.

The competition was witnessed by principal Pallavi Joshi and the students of grades I and II with great enthusiasm.

Their presence remarkably boosted the confidence and morale of the finalists. This competition made the students understand the importance of accuracy in spellings, clarity in pronunciations, team work and sensitivity of time. The event concluded with the principal's address and declaration of the final result.
