

“Early child care and education is more than preparation for primary school. It aims at the holistic development of a child’s social, emotional, cognitive and physical needs in order to build a strong foundation for lifelong learning and wellbeing.”

Early childhood education lays a strong foundation for lifelong learning. It is here at the Kindergarten that a strong base is laid for a child’s learning abilities including cognitive and social development. Kindergarten provides your child with an opportunity to learn and practice the essential social, emotional, problem-solving, and study skills that he/she will use throughout his /her schooling.

Early childhood education is an essential building block of a child’s future success.

We at City Kids with a solemn dedication, strive towards establishing a solid foundation of education from which children can adapt to school systems and learn successfully.

A highly motivated team of teachers help the children to develop primary skills that form the foundation for reading, writing, numeracy and social interaction.

At City Kids we follow an activity based learning programme which includes dance, music, art and games. We provide a variety of learning experiences that are fun and learning-oriented at the same time.

We consider it our paramount duty to instill in every child interest for learning and increase the curiosity for his/her surroundings through exposure to the outside world.

Our focus is on helping the child to:

▪	Learn to coordinate and cooperate with fellow students
▪	Become more aware of their surroundings
▪	Respect others and start understanding others feelings
▪	Develop language skills, numeracy and reading stories
▪	Make friends
▪	Receptive to new concepts and ideas
▪	Build confidence and develop self-esteem
▪	Improve communication skills
▪	Express their creativity through art, drawings, music and dance
▪	Develop academic skills like reading, writing and counting
▪	Develop : Gross motor skills, Fine motor skills, Cognitive skills and Language skills
▪	Develop natural love of learning and develop curiosity

A child’s greatest power of learning is from the day they are born to 5 years of age. These years are the most formative of a child’s life. We use a unique blend of qualified teachers and support staff to care for and stimulate your child’s mind. By the time your child grows to go to

Primary school, he/she will have been taught first stage reading and writing, beginner’s English and Music and Movement. Main areas of learning are development of mathematical concepts, communication, language and literacy, knowledge and understanding of the world, creative development, personal and social education and physical development.

- To develop good physical and mental health of the children and equip them with creative and social skills.
- To encourage the children to explore, ask question and experiment.
- To develop child's intellectual potential.
- To stimulate their curiosity, observation and thinking abilities.
- To foster self-esteem.
- To develop their motor skills.
- Keeping in mind the goals of Pre School, To provide structured teaching learning process that is :
 - * Activity Based – Promotes Co-operation and Coordination.
 - * Project Based – Creative skills, Observation and Application.
 - * Based on Play way Methods – Interesting and Interactive.

The classrooms are spacious, well lit and ventilated. Furniture is light, bright & comfortable.

PRE-PRIMARY STAGE: (3 yrs – Nursery, Junior Kinder Garten, Senior Kinder Garten)

Stress is given on communication skills and language development. Children learn to express themselves with confidence, develop self – esteem and a love for learning which provides the foundation for all future learning. A child's Physical and Mental development is more rapid during the Pre-Primary Schooling days than any other period in life. Keeping this in mind the City International Group of Schools have developed a balanced programme and a time – table that gives enough time and opportunity for physical and mental development.

ACTIVITY TIME: where colourful paper, crayons ,play dough are offered to children which stimulates their curiosity and creativity.

MONTHLY THEME: includes a colour day where children come dressed in that particular colour with related activity.
